

APPENDIX - B

Appendix B. Software Environment

The list of software products below is divided into two categories.

First is a list of the products in use statewide in courts to which the Customer Support Center provides assistance. There are many other products in use in the superior, justice, and municipal courts statewide, most often supported by the IT staff of the local court, city, or county government. At the state level, however, these are not supported and not included in the list below. Refer to individual court plans in Appendix D for their lists of local software.

The second list includes those products in use at the Supreme Court and the Administrative Office of the Courts.

COURTS

Software in courts that is supported statewide in conjunction with existing programs:

SOFTWARE APPLICATION	VENDOR	NO. USERS	COMMENTS
AJACS (GJ & LJ CMS)	AmCad, Inc. Herndon, VA	2239 PCs 145 courts, 3200 users	The Court Case and Cash Management Software for the Arizona Court Automation Project (ACAP)
